What is the difference between
a sallow skin, dull eyes and faded
cheeks, and a ruddy complexion,
bright eyes and rosy cheeks?

There are 2 answers:—

1st ANSWER: One is ugliness; the other
is beauty.

2nd ANSWER: 25 cents difference. For
25 cents will secure a three weeks
treatment (two different medicines)
which will correct your disordered liver,
banish all poisonous bile, purify your
blood, stimulate appetite, tone up the
nerves, and make a new creature of you.

This is a famous remedy, and
while perfectly harmless, it never
fails. It is made of the purest
preparations.

THOUGHT MICROBES.

Sorrow and Disappointment as Diseases
for the Doctors.

It is claimed by some of the more ad-
vanced of modern writers that excesses
of all sorts are produced by a morbid
condition of the mind, brought about
by the presence of microbes in undue
numbers. From tuberculosis to tem-
per, from melancholia to these
theorists declare that microbes are the
cause of all conditions anywhere out-
side of the normal. And maybe the
day will come when these people will
be found not so far from the right as
scorers now profess to believe. Those
who dive deep into the hidden myste-
ries of existence find many quaint and
curious things not seen by average
eyes. There is an invisible, intangible,
mental as well as a material micro-
scope, and they who understand its
handling and adjustment learn much
of interest, much that is suppressed
because of the storm of ridicule that it
would provoke, and which for this reason
they care nothing about exhibiting
to the outer world.

It is no secret to many persons of ex-
treme temperament that a thought mi-
crobe can be so increased and multi-
plied that it dominates not only the en-
tire mental but physical system. There
are cases where the memory takes pos-
session of the individual; a sudden flash
of light from the ether, a suggestion
opens the door of the past, and all con-
ditions are right for an absolute over-
whelming of the entire being with this
living tide. And many doctors would
at once diagnose the malady as mala-
ria, nervous fever, depression of the
vital forces, or in some cases inflamma-
tion of the brain. This state of affairs,
simple enough at the outset and charac-
terized by a little fever, a slightly
accelerated pulse, a trifling flush of the
cheeks and like indications increase
with rapidity until the sufferer is in a
condition bordering on mental distra-
ction. The doctor comes in, prescribes
drugs and a fever regimen, reduces the
diet, orders cooling applications and
goes away much worried lest the pa-
tient runs into brain fever or some
new complaint with an unpronounce-
able name and a fatal termination. Had
this professional adviser of the sick and
suffering the power to use the mental
microscope, it would take him but a
short time to discover that the malady
was not in any sense physical or depend-
ent upon any of the bodily functions.
He would find hordes of bacilli, disap-
pointment, unexplained and un-
explained, and in some cases inflamma-
tion of the brain, and in some cases
inflammation of the brain, and in some
cases inflammation of the brain, and in
